

### **I. Amendment to Claims**

The following is a listing of all claims in the Application with their status and the text for all active claims.

- 1.-4. (PREVIOUSLY CANCELED)
5. (CURRENTLY AMENDED) A device for hanging objects there from, suitable for insertion into an awning roller rail having a substantially circular opening on each of two ends and a channel running the length of said awning roller rail, or other like apparatuses, ~~comprising~~ consisting of:
  - a body of J-shaped configuration of a predetermined width, having a first end and a downward terminating second end including a U-shaped cradle for receiving objects thereon, and;
  - a closed tubular body of a predetermined length having a substantially circular cross-section, fixedly and horizontally mounted to said first end of said J-shaped body.
6. (CURRENTLY AMENDED) The device for hanging objects there from of Claim 5, wherein said tubular body of substantially circular cross-section has a circumference suitable for insertion into said substantially circular opening on an end of an awning roller rail, or other suitable apparatuses, allowing said body of J-shaped configuration to extend through said channel, without said tubular body passing through said awning roller rail channel.

7. (CURRENTLY AMENDED) The device for hanging objects there from of Claim 5, wherein said body of J-shaped configuration defining a predetermined width being ~~the width of said body of J-shaped~~ configuration is substantially equivalent to the said predetermined length of said body of substantially circular cross-section.
8. (CANCELED)
9. (CANCELED)
